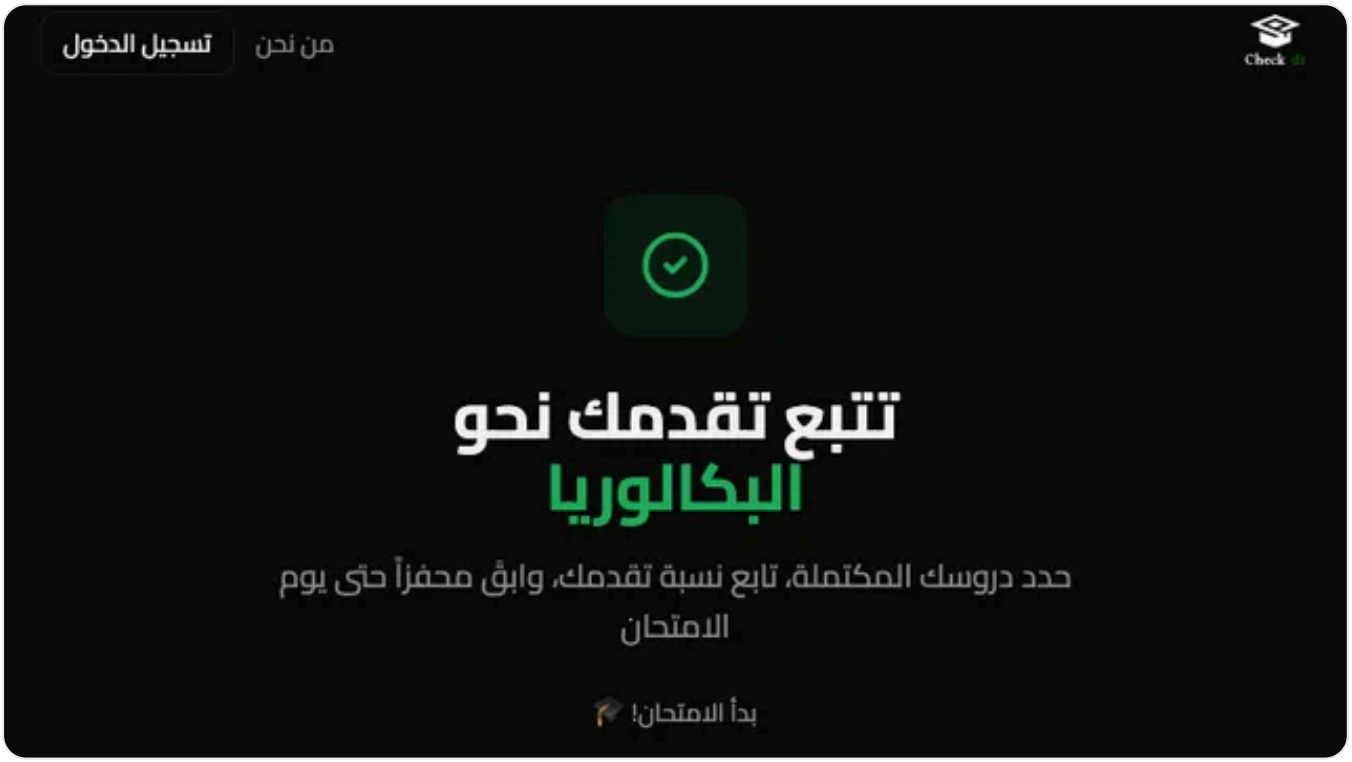
Check Bac

A free Baccalaureate progress tracker for Algerian students to mark completed lessons, monitor subject progress, and stay motivated before exam day.



About

Check Bac is a Baccalaureate progress tracker for Algerian students who want a simple way to follow lessons and stay on pace before the exam. It lets you mark completed lessons, see how far you have advanced in each subject, and keep motivation high as the Baccalaureate approaches. The app is presented as free 100%, so students can use it without a paid plan.

What is Check Bac

Check Bac is a Baccalaureate progress tracker built to help Algerian students keep tabs

flashcards, or mock exams, which makes it a straightforward Baccalaureate progress tracker for anyone who wants to see what is done and what still needs work.

According to the site copy, the tool is designed to help students follow their progress easily, track completion by subject, and stay motivated until exam day. The promise is simple: a free way to manage Baccalaureate study progress without extra complexity.

This makes Check Bac useful if you want a visual overview of your preparation instead of a general study app. It is centered on the Baccalaureate progression process itself, so the core experience is about checking lessons off and watching the percentage move.

Key features

Check Bac keeps the feature set narrow and focused on study tracking. As a Baccalaureate progress tracker, it emphasizes the parts that matter most for exam preparation.

- Mark completed lessons so you can see what is finished.
- Track completion percentages for each subject.
- Use the progress view to understand where you are ahead and where you still need work.
- Stay motivated with a simple structure that shows study momentum over time.
- Access the app free of charge, based on the site's "100% free" message.

The main value here is clarity. A Baccalaureate progress tracker is most useful when it avoids clutter, and Check Bac appears to do exactly that. It does not claim to be an all-in-one learning platform; instead, it gives students a clean progress checklist for exam preparation.

How to use it

Using this Baccalaureate progress tracker appears to be a matter of opening the site and updating your study status as you go.

- Open the Check Bac website in your browser.
- Review the subjects and lessons you are working through.

- Return regularly so the tracker reflects your current Baccalaureate preparation.

Because the public site text is brief, the exact account setup flow, if any, is unknown. The safe assumption is that the app is meant to be quick to start and easy to update. If you already have a study plan, you can map it onto the tracker and use the Baccalaureate progress tracker as a daily checkpoint.

Who it is for

Check Bac is aimed at Algerian students preparing for the Baccalaureate. The wording on the site makes that audience explicit, and the app is shaped around that exam context.

It is a good fit for:

- Students who want a simple Baccalaureate progress tracker.
- Learners who prefer checking off completed lessons over using a complex planner.
- Anyone who wants a subject-by-subject view of preparation.
- Students who benefit from seeing percentage-based progress during revision.

It is less suitable for people looking for broad course content, tutoring, or advanced analytics. The app's value is in tracking progress, not teaching lessons from scratch.

What to know before you use it

Check Bac looks practical, but there are a few limits to keep in mind before relying on it as your only study tool.

- The site copy does not explain whether progress is saved with an account, locally in the browser, or another method, so persistence details are unknown.
- It appears to track lesson completion and subject percentage, but it does not advertise built-in tutoring, question banks, or grading.
- Any progress percentage is only as accurate as the lesson status you enter, so it should not be treated as an official measure of exam readiness.
- Since the app is specific to Baccalaureate study, it is not a replacement for official syllabi, school guidance, or ministry resources.

For students who want a focused, free Baccalaureate progress tracker, Check Bac stays within a clear lane: track what you have finished, see your subject progress, and keep moving toward exam day. That narrow purpose is also its strength, because a Baccalaureate progress tracker works best when it is easy to open, easy to update, and easy to trust for daily study discipline.
